### **Deconcentration & Income Mixing**

#### **Component 3, (6) Deconcentration and Income Mixing**

- a. ☐ Yes ☒ No: Does the PHA have any general occupancy (family) public housing developments covered by the de-concentration rule? If no, this section is complete. If yes, continue to the next question.
- b. ☐ Yes ☐ No: Do any of these covered developments have average incomes above or below 85% to 115% of the average incomes of all such developments? If no, this section is complete.

If yes, list these developments as follows:

<b>De-concentration Policy for Covered Developments</b>			
<b>Development Name:</b>	<b>Number of Units</b>	<b>Explanation (if any) [see step 4 at §903.2(c)(1)(iv)]</b>	<b>Deconcentration policy (if no explanation) [see step 5 at §903.2(c)(1)(v)]</b>

#### **DE-CONCENTRATION OF POVERTY AND INCOME-MIXING**

The SCHAs admission policy is designed to provide for de-concentration of poverty and income mixing by bringing higher income tenants into lower income projects and lower income tenants into higher income projects.

Nothing in the de-concentration policy relieves the SCHAs of the obligation to meet the income- targeting requirement.

Gross annual income is used for income limits at admission and for income-mixing purposes.

#### **De-concentration and Income-Mixing Goals**

The SCHAs de-concentration and income-mixing goal, in conjunction with the requirement to target at least 40 percent of new admissions to public housing in each fiscal year to "extremely low-income families", will be to admit families above the SCHAs Established Income Range (EIR) to developments below the EIR, and families below the SCHAs EIR to developments above the EIR.

De-concentration applies to transfer families as well as applicant families.

### **De-concentration Applicability**

The SCHAs have covered developments (general occupancy, family developments) subject to the de-concentration requirement. These covered developments are described in the SCHAs Plan.

### **Project Designation Methodology**

Annually, the SCHAs will determine on an annual basis the average income of all families residing in general occupancy developments

The SCHAs will then determine the average income of all families residing in each general occupancy development.

The SCHAs will then determine whether each general occupancy development falls above, within or below the Established Income Range (EIR).

The EIR is 85 percent to 115 percent (inclusive of 85 percent and 115 percent) of the SCHAs wide average income for general occupancy developments.

If a covered development is both below the 30 percent area-wide median and above the 115 percent income average for SCHAs-wide covered developments, it will be considered to be within the EIR.

The SCHAs will then determine whether or not developments outside the EIR are consistent with local goals and strategies in the SCHAs Plan. Any de-concentration policy as needed is described in the SCHAs Plan.

### **De-concentration Policy**

If, at annual review, there are found to be development(s) with average income above or below the EIR, and where the income profile for a general occupancy development above or below the EIR is not explained or justified in the SCHAs Plan, the SCHAs shall list these covered developments in the SCHAs Annual Plan.
